PROFILE

I am an aspiring Frontend Developer with a strong interest in building intuitive and responsive web applications. I have a solid understanding of HTML, CSS, and JavaScript, and I am eager to expand my knowledge of modern frameworks and libraries like React. With a focus on clean design and seamless user experience, I am always looking for opportunities to apply my skills and grow as a developer.

PROJECTS

Portfolio Website

- Developed a personal portfolio website to showcase my skills and projects using HTML, CSS, and JavaScript.
- Implemented responsive design to ensure a seamless experience across devices.
- Utilized CSS Grid and Flexbox for layout design, enhancing visual appeal and usability.
- Github link :

Weather App

- Developed a weather application that fetches real-time data from a weather API using JavaScript.
- Designed an intuitive user interface with responsive design principles.
- Implemented features such as location search, displaying current weather conditions.

To-Do List Application

- Built a fully functional to-do list application using HTML, CSS, and JavaScript.
- Designed a user-friendly interface allowing users to add, delete, and mark tasks as complete.
- Stored tasks in local storage to ensure data persistence across sessions.

Music Player

- Developed a fully functional music player using HTML, CSS, and JavaScript to provide users with an interactive audio experience.
- Implemented features such as play, pause, skip, and volume control, enhancing user engagement and usability.
